LOCATE THE ACTIVATION CARD INSIDE YOUR PACKAGE FIRST

1. Get Started
   - Call *22890 from your phone. Make sure to include the * (star) key.
   - If the Activation is successful, you will receive a confirmation message.
   - Make a test call to complete the Activation process.
   - If you do not receive a successful confirmation message, wait a few minutes and call *22890 again.

2. About Your Straight Talk Wireless Service
   - Go to StraightTalk.com or call 1-877-430-2355 to activate your service. Be ready to provide the following:
     - Service Plan PIN. You may also purchase one during activation using a credit or debit card.
     - Serial Number or MEID DEC for this device (shown below)
     - If you transfer your number from a different company, provide the accurate:
       - ACTIVE phone number to transfer
       - Current Service Account Number, Name, and Address
       - Current Service Account Password or PIN
       - Alternate contact phone number

3. How To Use Your Straight Talk Wireless Phone
   - GETTING STARTED
   - PROGRAM YOUR PHONE
   - CHECK YOUR DATA USAGE
   - REFILL AND CHECK YOUR BALANCE

HEALTH AND SAFETY INFORMATION
1.1 WHAT’S IN YOUR PACKAGE

- Straight Talk Wireless Phone
- Back Cover
- Charger/USB Cable

1.2 ACTIVATE YOUR STRAIGHT TALK WIRELESS PHONE

A Locate your Activation Card and follow the instructions on the card.

If you are a current Straight Talk customer it’s easy to transfer your service to another Straight Talk phone. To transfer your service, go to StraightTalk.com, then select the Activate/Reactivate tab and select the Phones option. To keep your existing phone number, select Transfer my existing Straight Talk Service, then follow the instructions. You will need the information on the red Activation Card in your package to continue the Activation process. For additional help, call the Customer Care Center at 1-877-430-2355.

B This card has the serial number you need to activate your phone.

C To activate, go to StraightTalk.com or call 1-877-430-2355 from another phone.

D To complete the activation process you must call *22890 wait for the confirmation message, and then make a call.
1.3 SET UP YOUR STRAIGHT TALK WIRELESS ACCOUNT

*My Account* can be created upon activation of your phone at StraightTalk.com. This is where you will create and update your personal profile information, update credit/billing information, view your Service End Date, and more.

*My Account is the best place to:*
- Buy or Add a Service Plan
- Enroll in Auto-Refill
- Manage your Straight Talk Reserve™
- Check Balance/Service End Date
- See Account Reminders and Service Updates
- Update Personal Profile and Manage Credit Card Info
- View Payment History
- Get Newsletter Access
- Learn how to use your device
- Get International Calling Information
- View FAQs

2. ABOUT YOUR STRAIGHT TALK WIRELESS SERVICE

2.1 Keep Your Service Active
2.2 Refill Options
2.3 Service Plans
2.1 KEEP YOUR SERVICE ACTIVE

Refill your Service BEFORE your Service End Date to keep your Service Active. To check your Service End Date go to StraightTalk.com and log into your account or call our Customer Care Center at 1-877-430-2355.

How it Works

Add to Straight Talk Reserve™

• When refilling your service before your Service End Date, you may choose to add your plan to your Straight Talk Reserve™. Plans added to your reserve are automatically applied to your phone on your Service End Date.

• There is no limit to the number of Service Plans that can be added to your reserve. You can view and add plans from your reserve before your Service End Date by visiting StraightTalk.com and logging into your account.

Add Now

When refilling your service before your Service End Date, you may choose to immediately add a plan to your service rather than adding it to your StraightTalk Reserve™. Please note that if you choose this option, or if you add a plan from your reserve before your Service End Date, it will cause your new plan to begin immediately and you will lose any remaining service, including service days from your current service plan.
2.3 SERVICE PLANS

Your phone will ONLY work with Straight Talk Wireless 30-Day Monthly Plans for cellular phones. You can purchase the plan that best fits your needs at:
- Participating Walmart stores
- Walmart.com
- StraightTalk.com
- Customer Care Center 1-877-430-2355

2.2 REFILL OPTIONS

Set Up Auto-Refill
Enroll in Auto-Refill at StraightTalk.com by using a credit card or debit card and your service will automatically refill on your Service End Date. This service includes pre-charge reminders, payment receipts, and credit card expiration alerts.

Buy a Service Plan
There are several ways to buy a Service Plan:
- Visit any participating Walmart store
- Go to Walmart.com
- Go to StraightTalk.com
- Call our Customer Care Center at 1-877-430-2355

Add a Service Plan
To add a Service Plan purchased at the retailer:
- Download the Straight Talk My Account App and select the Add option
- Go to StraightTalk.com
- Call our Customer Care Center at 1-877-430-2355
3. Unlock Your Screen

To unlock your screen, long-press any section of the screen. If the screen is dark, simply press PWR/LOCK to enable it.

3.2 Find Your Serial Number

1. Press the HOME key.
2. Tap the Apps icon, located at the bottom of the screen.
3. Slide your finger to the left across the screen and tap Settings.
4. Slide your finger upwards along the screen to access additional options. Tap About phone.
5. Tap Status. Your phone’s Serial Number appears below MEID(D).
   Do not use the number in the row labeled Serial number.
6. To return to the main screen, press the HOME key.
3.3 FIND YOUR PHONE NUMBER

1. Press the HOME key.
2. Tap the Apps icon, located at the bottom of the screen.
3. Slide your finger to the left across the screen and tap Settings.
4. Slide your finger upwards along the screen to access additional options. Tap About phone.
5. Tap Status. Your phone number appears below My phone number.
6. To return to the main screen, press the HOME key.

3.4 MAKE AND RECEIVE CALLS

Make a call
1. Press the HOME key.
2. Tap the Phone icon located at the bottom of the screen. If the dialpad does not appear on the screen, tap the Dialpad icon located at the bottom of the screen.
3. Enter the phone number you wish to call, including the 3-digit area code. Entering a 1 before the area code may be necessary in some areas.
4. To place the call, tap the Phone icon located at the bottom of the screen.
5. To end the call, tap End.

Receive a call
1. To answer an incoming call, slide the Answer icon down.
2. To end the call, tap End.

3.5 MAKE INTERNATIONAL CALLS

Straight Talk International App
The Straight Talk International App allows you to make an international call without having to dial an access number first. Simply follow the instructions below.

1. Download the free Straight Talk International Android™ App from Google Play™. Once the app is downloaded, you will not need to launch it to complete an international call.
2. Tap the Phone icon, at the bottom of the screen, and enter the international number, or select the international contact you wish to call. For calls to most countries, enter 011 + Country Code + City Code + Phone Number. For calls to Canada or the Caribbean, enter 1 + Area Code + Phone Number.
3. The application will dial the access code automatically. Your call will be connected.
4. To end the call, tap End.

If you do not have access to the app
To make an international call, you will need to dial an access number first. Simply follow the instructions below.

1. Tap the Phone icon at the bottom of the screen and enter the international access number 1-410-635-5555. Save this number to your contacts for future access.
2. Once you hear a dial tone, enter the international number you wish to call. For calls to most countries, enter 011 + Country Code + City Code + Phone Number. For calls to Canada or the Caribbean, enter 1 + Area Code + Phone Number.
3. To end the call, tap End.
3.6 SET UP YOUR GOOGLE™ ACCOUNT

To access Google Play™, as well as other applications on your phone, you will need to add or create a free Google Account (i.e. Gmail Account).

1. Press the HOME key.
2. Tap the Google icon.
3. Tap the Gmail icon. Follow the tutorial on your screen to add your Google Account.
4. To return to the main screen, press the HOME key.

The first Google account that you register to your phone will be your Primary Google account. Once you register a Google Account to your phone, your contacts, calendar entries, and Gmail will sync with your primary Google Account. It can take up to 15 minutes for your phone to sync with the Google server.

3.7 SET UP YOUR VOICEMAIL

1. Press the HOME key.
2. Tap the Phone icon located at the bottom of the screen. If the keypad does not appear on the screen, tap the Keypad icon located at the bottom of the screen.
3. Press and hold the 1 key for several seconds. Your phone will automatically call Voicemail. Once the call is connected, follow the voicemail prompts.
4. To end the call, tap End.

3.8 SEND TEXT MESSAGES

1. Press the HOME key.
2. Tap the Messaging icon located at the bottom of the screen.
3. To compose a new message, tap New message located at the bottom of the screen.
4. Enter the contact name or the mobile number of the desired recipient in the To field. If entering the contact, tap the name when it appears.
5. Tap Type message and enter the message you wish to send.
6. When finished, tap the Send icon.
7. To return to the main screen, press the HOME key.
3.9 SET UP YOUR BLUETOOTH®

To pair your phone with a Bluetooth headset, make sure that both are fully charged. Have your headset within a range of 30 feet from your phone. Make sure your device is ON and in Pairing or Bonding Mode (refer to the user guide of the device you are attempting to pair with). Please remember that you can connect to only one device at a time.

1. Press the HOME key.
2. Tap the Apps icon, located at the bottom of the screen.
3. Slide your finger to the left across the screen and tap Settings.
4. Tap the ON/OFF button to the right of Bluetooth to turn it ON.
5. Tap Bluetooth. A list of the available devices will be populated.
6. Tap the name of the desired device and wait for the devices to pair.
7. Follow the prompts on the phone screen to complete the pairing process.
8. To return to the main screen, press the HOME key.

IMPORTANT: If you are prompted for a PIN, please refer to your headset’s user guide. A commonly used PIN for headsets is 0000. Enter the PIN into your phone and follow the prompts to complete the pairing process.

3.10 TAKE AND SHARE YOUR PICTURES

Take a picture
1. Press the HOME key.
2. Tap the Apps icon, located at the bottom of the screen.
3. Tap the Camera icon.
4. To take a picture, tap the camera icon at the bottom of the screen.

Front-facing camera
1. Press the HOME key.
2. Tap the Apps icon, located at the bottom of the screen.
3. Tap the Camera icon.
4. Tap the front-facing camera icon located at the top of the screen.
5. To take a picture, the camera icon at the bottom of the screen. The picture will be automatically saved in your Gallery.

Share the picture
1. Tap the picture thumbnail located at the bottom of the screen. Your phone will display the last image captured.
2. Tap the Share icon at the bottom of your screen. If it does not appear, simply tap the screen. All available sharing options will appear.
3. Tap the Messaging icon.
4. Enter the contact name or the mobile number of the desired recipient in the To field. If entering the contact, tap the name when it appears.
5. Tap Type message and enter the message you wish to send.
6. When finished, tap the Send MMS icon.
7. To return to the main screen, press the HOME key.
3.11 PERSONALIZE WITH RINGTONES AND MORE

A) Personalize with Ringtones
1. Press the HOME key.
2. Tap the Apps icon, located at the bottom of the screen.
3. Slide your finger to the left across the screen and tap Settings.
4. Tap Sound.
5. Tap Phone ringtone.
6. Tap the ringtone of your preference to listen to it. Slide your finger along the screen to access additional options.
7. Once you have selected the ringtone you wish to use, tap OK.
8. To return to the main screen, press the HOME key.

B) Personalize with Graphics
1. Press the HOME key.
2. Tap the Apps icon, located at the bottom of the screen.
3. Slide your finger to the left across the screen and tap Settings.
4. Tap Display.
5. Tap Wallpaper.
6. Select the folder that contains the graphic you wish to use.
7. Thumbnails of the available images will be displayed. Tap the one you want to use. You may need to size and frame the image.
8. Tap OK or Set wallpaper.

C) Download Applications and Content
From the main screen, tap the Play Store icon to access Google Play™. Browse thousands of apps, games, music and more.

The Play Store
With phones powered by Android™, you can access over 1,000,000 free and pay-for apps that are available at the Play Store. To purchase content or an app from the Play Store, you will need a Gmail account and a credit or debit card. The purchases you make are a transaction between you and Google and/or the Application Developer. Customer Care will not be able to provide technical assistance or refunds/credits for your purchases. We suggest that before you purchase any apps, that you look at the reviews about those that you are interested in purchasing. The Play Store may allow app orders to be cancelled within 15 minutes. Please refer to the Play Store website for details. If you receive an error code during the purchase process, visit google.com/support/googleplay.
### 3.12 MANAGE APPLICATIONS

1. Press the **HOME** key.
2. Tap the **Apps** icon, located at the bottom of the screen.
3. Slide your finger to the left across the screen and tap **Settings**.
4. Slide your finger upwards along the screen and tap **Apps**.
5. Note the tabs at the top of the screen. To see what applications are currently running, tap the **RUNNING** tab.
6. Tap the application that you would like to manage and choose what you would like to do.
7. To return to the main screen, press the **HOME** key.

*Applications running in the background can drain the battery and slow down the processing speed of your phone.*

### 3.13 USE THE MOBILE INTERNET SERVICES

The Straight Talk Mobile Web allows you access to news, sports, weather, entertainment, and more directly from your phone. To access the Straight Talk Mobile Web, press the **Home** key, then tap the **Internet** icon at the bottom of the screen. Your phone will then connect to the Mobile Web.

**IMPORTANT:** After your phone is Active, it may take up to 1 hour to access Mobile Web Services.

### 3.14 SECURITY SETTINGS

**Set your Screen Lock options**

There are several security options that will protect your data and limit access to your phone. To set up your preferences:

1. Press the **Home** key > **Apps** icon > **Settings** > **Security** > **Screen lock**. Select the screen lock that you prefer.
2. Follow the on-screen prompts to set up the security option of your choice.

**Forgot your security setting?**

- If you attempt to unlock your screen with an incorrect pattern more times than what is allowed, your phone will require you to wait 30 seconds before attempting your pattern again.

- If you are still unable to unlock your screen, please call the Customer Care Center at 1-877-430-2355 to reset your phone. Be aware that this erases all data from the internal memory of your phone and restores the phone to the original factory settings. Once your phone is reset, you can recover your synced information by logging into your primary Gmail account.
3.15 ADDITIONAL FEATURES

A) Access or Replace Memory Card

Your phone will accept a memory card of up to 32GB.

To access this card:

Locate the memory card compartment
1. Power your phone OFF.
2. Remove the back cover by lifting it using the notch at the bottom left corner of the phone.
3. The memory card compartment is located on the right side of the phone.

Insert the card
1. Arrange the memory card so that the gold bars on the card are facing down and gently slide it all the way in.
2. Replace the back cover and power your phone ON.

Remove the card
1. Slide the memory card out. We recommend that you have your phone turned OFF.
2. Replace the back cover and power your phone ON.

B) Your Music

Play and Access Your Music Files
- You can play a variety of sound files and access music files on your phone.
- You can listen to the music stored in your phone via Bluetooth.
- You can separate your music by Playlist, Tracks, Albums, Artists, Genres and Folders.

Transfer Your Music Files
To transfer music files to a computer you will need the USB Cable provided with the phone. Refer to your computer’s user guide for instructions on how to transfer content. Your phone does not support DRM protected music files*.

*The unauthorized copying of copyrighted materials is contrary to the provisions of the Copyright laws in the United States and in other countries. This device is intended solely for copying non-copyrighted material, material for which you own the copyright, or material which you are legally permitted to copy. If you are uncertain about your right to copy any material, please contact your legal advisor.
3.16 Tips

- To access notifications in the Notifications Panel at the top of the screen, slide your finger down from the top of the screen. All new messages and notifications will be displayed; tap the notification you wish to see for direct access to it.

- You can easily access to your phone's settings by sliding down the Notifications Panel and tapping on the icon located at the top of the screen. Then, tap the SETTINGS icon located at the top of the screen.

- Your phone has several customizable screens that give you easier access to your most commonly used content and applications.
  - Slide your finger across the screen in either direction to access the different home screens.
  - To move an icon to a particular screen, go to the screen where you want the icon to be, tap the Apps icon, then tap and hold the app icon you wish to add until it appears on the desired screen.
  - You can easily organize all your applications by editing, uninstalling/disabling or hiding them: Home screen > Apps icon > Tap the Menu icon at the bottom of the screen > Choose the action you want to perform.

- For increased data speeds, use a secure Wi-Fi® connection where available.

- Your phone will automatically back up to your Gmail account.
  In order for your contacts, paid apps, calendar, and Gmail to be restored when you set up an Android phone using the same primary Gmail account:
  1. Press the Home key > Apps icon > Settings > Add account > Google.
  2. Tap on your primary Gmail account and then tap to select the features you would like automatically backed up/synced.

- Don't wait until it's too late to back up your phone! Multimedia and other files will need to be backed up manually. To back up files like your photos and videos, search on Google Play to find the app that fits your needs. Or simply:
  1. Press the HOME key.
  2. Tap the Apps icon.
  3. Slide your finger to the left across the screen and tap Settings.
  4. Tap Backup & reset for options.

- A Master or Factory Data Reset erases everything on the internal memory of your phone including the Gmail account access. You should remember your Gmail account's user name and password before performing a factory reset. After a reset is performed, you can sync your information to your phone again by logging in to your primary Gmail account from your phone.

- To extend your battery life, follow some of the tips listed below:
  - Check Running Services and close any unnecessary applications.
  - Use the Apps feature to end/shutdown applications that are still running in the background.
  - Turn off Bluetooth® and GPS when not in use.
  - Turn off automatic application sync.
  - Set Screen Timeout to the lowest setting (factory default is 30 seconds).
  - Reduce your data usage.
  - Reduce use of the Live Wallpapers.
  - Use the factory charger provided to avoid battery damage.

For additional information about your phone, you can view or download the manufacturer's manual at StraightTalk.com. For an interactive tutorial of your phone, please visit StraightTalk.com. Hold your cursor over Support. Select Manuals. Select your phone model and click on LEARN MORE.

## Radio Frequency (RF) Energy

This model phone meets the government’s requirements for exposure to radio waves.

This phone is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government:

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. *Tests for SAR are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

The highest SAR values for this model phone as reported to the FCC when tested for use at the ear and on the body are:

- **Head:** 0.76 W/kg
- **Body:** 1.21 W/kg
**Hearing Aid Compatibility (HAC) Regulations for Mobile Phones**

In 2003, the FCC adopted rules to make digital wireless telephones compatible with hearing aids and cochlear implants. Although analog wireless phones do not usually cause interference with hearing aids or cochlear implants, digital wireless phones sometimes do because of electromagnetic energy emitted by the phone’s antenna, backlight, or other components. Your phone is compliant with FCC HAC regulations (ANSI C63.19-2011).

While some wireless phones are used near some hearing devices (hearing aids and cochlear implants), users may detect a buzzing, humming, or whining noise. Some hearing devices are more immune than others to this interference noise, and phones also vary in the amount of interference they generate. The wireless telephone industry has developed ratings for some of their mobile phones to assist hearing device users in finding phones that may be compatible with their hearing devices. Not all phones have been rated. Phones that have been rated have a label on the box. These ratings are not guaranteed. Results will vary, depending on the level of immunity of your hearing device and the degree of your hearing loss. If your hearing device happens to be vulnerable to interference, you may not be able to use a rated phone successfully. Trying out the phone with your hearing device is the best way to evaluate it for your personal needs.

This phone has been tested and rated for use with hearing aids for some of the wireless technologies that it uses. However, there may be some newer wireless technologies used in this phone that have not been tested yet for use with hearing aids. It is important to try the different features of this phone thoroughly and in different locations, using your hearing aid or cochlear implant, to determine if you hear any interfering noise. Consult your service provider or the manufacturer of this phone for information on hearing aid compatibility. If you have questions about return or exchange policies, consult your service provider or phone retailer.

**M-Ratings:** Phones rated M3 or M4 meet FCC requirements and are likely to generate less interference with hearing devices than phones that are not labeled. M4 is the better/higher of the two ratings.

**T-Ratings:** Phones rated T3 or T4 meet FCC requirements and are likely to be more usable with a hearing device’s telecoil (“T Switch” or “Telephone Switch”) than unrated phones. T4 is the better/higher of the two ratings. (Note that not all hearing devices contain telecoils.)

**Your Z793C has been tested for hearing aid device compatibility and has an M4/T4 rating.**

Hearing devices may also be measured for immunity to this type of interference. Your hearing device manufacturer or hearing health professional may help you find results for your hearing device.

For additional information about the FCC’s actions with regard to hearing aid-compatible wireless devices and other steps the FCC has taken to ensure that individuals with disabilities have access to telecommunications services, please go to www.fcc.gov/cgb/dro.

**Distraction**

Driving Full attention must be given to driving at all times in order to reduce the risk of an accident. Using a phone while driving (even with a hands free kit) can cause distraction and lead to an accident. You must comply with local laws and regulations restricting the use of wireless devices while driving.

**Operating Machinery**

Full attention must be given to operating machinery in order to reduce the risk of an accident.

**Product Handling**

**General Statement on Handling and Use**

You alone are responsible for how you use your phone and any consequences of its use. You must always turn off your phone wherever the use of a phone is prohibited.

Use of your phone is subject to safety measures designed to protect users and their environment.

- Always treat your phone and its accessories with care and keep it in a clean and dustfree place.
- Keep the screen and camera lens clean. Unclean screen or camera lens may slow down the phone’s reaction to your operations or lower image quality.
- Clean the device and its accessories with a soft material such as cleaning cloth for eyeglass lenses. Do not use alcohol or other corrosive substances for cleaning or allow them to get inside.
- Do not expose your phone or its accessories to open flames or lit tobacco products.
- Do not drop, throw or try to bend your phone or its accessories.
- Do not paint your phone or its accessories.
- Do not attempt to disassemble your phone or its accessories. Only authorized personnel can do so.
Do not expose or use your phone or its accessories in an environment with or that can reach extreme temperatures, minimum - [5] and maximum + [50] degrees Celsius.

Do not place your phone inside or near heating equipment or high-pressure containers, such as water heaters, microwave ovens, or hot cooking utensils. Otherwise, your phone may be damaged.

Please check local regulations for disposal of electronic products.

Do not carry your phone in your back pocket as it could break when you sit down.

Small Children
Do not leave your phone and its accessories within the reach of small children or allow them to play with it. They could hurt themselves or others, or could accidentally damage the phone. Your phone contains small parts with sharp edges that may cause an injury or may become detached and create a choking hazard.

Demagnetization
To avoid the risk of demagnetization, do not allow electronic devices or magnetic media to be close to your phone for a long time.

Electrostatic Discharge (ESD)
Do not touch the SIM/SD card’s metal connectors.

Antenna
Do not touch the antenna unnecessarily.

Normal Use Position
When placing or receiving a phone call, hold your phone to your ear, with the bottom towards your mouth.

Air Bags
Do not place a phone in the area over an air bag or in the air bag deployment area as an airbag inflates with great force and serious injury could result. Store the phone safely before driving your vehicle.

Seizures/Blackouts
The phone can produce a bright or flashing light. A small percentage of people may be susceptible to blackouts or seizures (even if they have never had one before) when exposed to flashing lights or light patterns such as when playing games or watching video. If you have experienced seizures or blackouts or have a family history of such occurrences, please consult a physician.

Repetitive Stress Injuries
To minimize the risk of Repetitive Strain Injury (RSI) when texting or playing games with your phone:

• Do not grip the phone too tightly.
• Press the buttons lightly.
• Use the special features that are designed to minimize the times of pressing buttons, such as Message Templates and Predictive Text.
• Take many breaks to stretch and relax.

Emergency Calls
This phone, like any wireless phone, operates using radio signals, which cannot guarantee connection in all conditions. Therefore, you must never rely solely on any wireless phone for emergency communications.

Loud Noise
This phone is capable of producing loud noises, which may damage your hearing. Turn down the volume before using headphones, Bluetooth stereo headsets or other audio devices.

Phone Heating
Your phone may become warm during charging and during normal use.

Electrical Safety

Accessories
Use only approved accessories. Do not connect with incompatible products or accessories. Take care not to touch or allow metal objects, such as coins or key rings, to contact or short-circuit in the battery terminals. Never puncture the surface of the battery with sharp objects.

Connection to a Car
Seek professional advice when connecting a phone interface to the vehicle electrical system.

Faulty and Damaged Products
Do not attempt to disassemble the phone or its accessories. Only qualified personnel can service or repair the phone or its accessories. If your phone (or its accessories) has been submerged in water, punctured, or subjected to a severe fall, do not use it until you have taken it to be checked at an authorized service center.

CTIA Requirements
• Do not disassemble or crush, bend or deform, puncture, or shred.
• Do not modify or remanufacture, attempt to insert foreign objects into the battery, immerse or expose to water or other liquids, expose to fire, explosion or other hazard.
• Only use the battery for the system for which it is specified.
• Only use the battery with a charging system that has been qualified with the system per CTIA Certification Requirements for Battery System Compliance to IEEE 1725. Use of an unqualified battery or charger may present a risk of fire, explosion, leakage, or other hazard.
• Do not short-circuit a battery or allow metallic conductive objects to contact battery terminals.
• Replace the battery only with another battery that has been qualified with the system per this standard, IEEE-Std-1725. Use of an unqualified battery may present a risk of fire, explosion, leakage or other hazard.
• Promptly dispose of used batteries in accordance with local regulations.
• Battery usage by children should be supervised.
• Avoid dropping the phone or battery. If the phone or battery is dropped, especially on a hard surface, and the user suspects damage, take it to a service center for inspection.
• Improper battery use may result in a fire, explosion, or other hazard.
• The phone shall only be connected to CTIA certified adapters, products that bear the USB-IF logo or products that have completed the USB-IF compliance program.

Radio Frequency Interference

General Statement on Interference
Care must be taken when using the phone in close proximity to personal medical devices, such as pacemakers and hearing aids.

Pacemakers
Pacemaker manufacturers recommend that a minimum separation of 15 cm be maintained between a mobile phone and a pacemaker to avoid potential interference with the pacemaker. To achieve this, use the phone on the opposite ear to your pacemaker and do not carry it in a breast pocket.

Hearing Aids
People with hearing aids or other cochlear implants may experience interfering noises when using wireless devices or when one is nearby. The level of interference will depend on the type of hearing device and the distance from the interference source. Increasing the separation between them may reduce the interference. You may also consult your hearing aid manufacturer to discuss alternatives.
Medical Devices
Please consult your doctor and the device manufacturer to determine if operation of your phone may interfere with the operation of your medical device.

Hospitals
Turn off your wireless device when requested to do so in hospitals, clinics or health care facilities. These requests are designed to prevent possible interference with sensitive medical equipment.

Aircraft
Turn off your wireless device whenever you are instructed to do so by airport or airline staff. Consult the airline staff about the use of wireless devices onboard the aircraft. If your device offers a "flight mode", this must be enabled prior to boarding an aircraft.

Interference in Cars
Please note that because of possible interference with electronic equipment, some vehicle manufacturers forbid the use of mobile phones in their vehicles unless a handsfree kit with an external antenna is included in the installation.

Explosive Environments
Gas Stations and Explosive Atmospheres In locations with potentially explosive atmospheres, obey all posted signs to turn off wireless devices such as your phone or other radio equipment. Areas with potentially explosive atmospheres include fueling areas, below decks on boats, fuel or chemical transfer or storage facilities, areas where the air contains chemicals or particles, such as grain, dust, or metal powders.

Blasting Caps and Areas
Power off your mobile phone or wireless device when in a blasting area or in areas posted power off “two-way radios” or “electronic devices” to avoid interfering with blasting operations.

Specifications
Handset specifications are shown in the following table.

<table>
<thead>
<tr>
<th>Specification</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Operating System</td>
<td>Android 4.4 (KitKat)</td>
</tr>
<tr>
<td>Handset Standards</td>
<td>CDMA 800/1900</td>
</tr>
<tr>
<td>Dimensions (H × W × D)</td>
<td>5.24” (H) x 2.6” (W) x 0.41” (D)</td>
</tr>
<tr>
<td>Weight</td>
<td>4.94 oz. (with battery)</td>
</tr>
<tr>
<td>Display</td>
<td>4.5” FWVGA 854 x 480</td>
</tr>
<tr>
<td>Camera</td>
<td>Rear 5.0 MP AF; Front VGA</td>
</tr>
<tr>
<td>Internal memory</td>
<td>ROM: 4 GB, RAM: 1 GB</td>
</tr>
<tr>
<td>Removable memory card</td>
<td>Supports microSDHC card up to 32 GB</td>
</tr>
<tr>
<td>Battery</td>
<td>2,000 mAh</td>
</tr>
<tr>
<td>Continuous idle time</td>
<td>Up to 8 days</td>
</tr>
<tr>
<td>Continuous talk time</td>
<td>Up to 12 hours</td>
</tr>
<tr>
<td>WAP browser version</td>
<td>WAP 2.0</td>
</tr>
<tr>
<td>Bluetooth</td>
<td>BT 4.0</td>
</tr>
<tr>
<td>HAC</td>
<td>M4/T4</td>
</tr>
</tbody>
</table>

NOTE: The phone’s talk time and idle time are based on ideal working environments. The use of extended backlighting, browser, and network conditions can reduce battery life and talk/idle time.
